**Background**

The Visitor Policy is a set of guidelines established by an organization to regulate the access and behaviour of visitors within its premises. This policy outlines the procedures for visitor registration, security checks, and the responsibilities of both visitors and employees regarding safety, confidentiality, and compliance with organizational rules and regulations. The primary goal of a Visitor Policy is to maintain security, protect sensitive information, and ensure a safe and welcoming environment for all individuals while aligning with the organization's overall security and operational objectives.

**Objective**

The objective of the Visitor Policy is to establish clear and standardized protocols for managing visitors within an organization's premises. This policy aims to enhance security, safeguard sensitive information, and promote safety for both visitors and employees by defining visitor registration procedures, access restrictions, and behavioural expectations. Ultimately, it seeks to create a secure and well-managed environment that aligns with the organization's security and operational goals while ensuring a positive and controlled visitor experience.

**Visitor Guidelines**

**Workplace Visitor**

1. Visitors are welcome during regular working hours. If you plan to visit after hours, please obtain written authorization from HR, Administration, or management.
2. Before entering the workplace, visitors must obtain permission from the relevant manager or Administration.
3. Upon arrival, visitors should sign in at the reception, gate, or front office, providing their entry time and showing government-issued identification for verification.
4. Visitors will be issued an entry pass or badge (without a photo) at the security desk, reception, or front office upon entering the office.
5. While inside the office premises, visitors are required to always wear the issued badge and return it when leaving.
6. For safety and guidance, all visitors must be accompanied either by security personnel or office support staff during their stay within the office premises.

CONFIDENTIAL

7. When departing the office, visitors should also sign out at the reception, gate, or front office, indicating their exit time.

**Personal Visitor**

Visitors coming to meet employees are kindly requested to be received in designated areas such as the visitor room, lobby, or reception area, and their visit should be brief and purpose specific. Access to other office areas is only allowed with prior authorization from the Manager of Administration. Employees are accountable for their visitors' behaviour and safety. If an unauthorized person is spotted on Aithent's premises, employees should promptly inform the Manager of Administration for necessary action.

**Contractors, Service Vendors and Candidates**

Contractors, suppliers, service vendors, and interview candidates are permitted access to our premises solely for their respective job-related purposes. Our Security and Admin teams are responsible for issuing badges to contractors and vendors and ensuring that they wear these badges consistently while on our premises.
The same protocol applies to interview candidates, who should be accompanied by either support staff or security personnel until they reach the designated HR representative. The HR representative is then responsible for the candidate's well-being and supervision while they are within the office premises.

**Unauthorized Visitors**

Our security personnel have the authority to request unauthorized visitors to vacate the premises. Visitors who engage in disruptive behaviour or unlawful activities, such as hate speech or theft, will be promptly asked to leave, and legal action may be taken when warranted. Employees who encounter unauthorized visitors are encouraged to report them to either the security team or the office manager for appropriate action.

**Important Note – Disciplinary Action**

Employees who violate this policy may face disciplinary consequences in proportion to their violation. HR will determine how serious an employee’s offense is and take the appropriate action.
